RESEARCH INTERESTS

My research focus on computer vision, deep learning, and artificial intelligence, with a particular concentration on *achieving human-like machine intelligence through studying data*. This entails exploring:

- (1) **Generation** and **manipulation** of 2D, 3D, and 4D visual data,
- (2) Use **augmented, synthetic, and distilled** data for training machine learning systems,
- (3) Understand the **role of data** through cognitive perspectives.

I am also interested in extending my research to other scientific domains, such as exploring the applications of AI in the field of health and biology.
