RESEARCH INTERESTS

My research focus on computer vision, deep learning, and artificial intelligence, with a particular concentration on studying data. This entails exploring:
(1) **Generation** and **manipulation** of 2D, 3D, and 4D visual data,
(2) Use **augmented, synthetic, and distilled** data for training machine learning systems,
(3) Understand the **role of data** through cognitive perspectives.
I am also interested in extending my research to other scientific domains, such as exploring the applications of AI in the field of health and biology.
